## PROJECTS

### **Rent On — A Real Estate Rental Solution**

I developed a rental website featuring easy property listings with intuitive property searches, tenant management, secure payments, and streamlined communication for hassle-free renting.

### **Hexa Shop — Online Shop Management**

I developed an online shop management website featuring inventory tracking, order processing, secure payments, analytics, and seamless customer communication tools.

### **Rafi Sharkar — A portfolio website**

I created a portfolio website showcasing my skills, projects, achievements, and experiences, offering an interactive and professional online presence.

### **K-mean Cluster — Digits Detection Image Processing**

I implemented a K-Means clustering approach for number classification in image processing, efficiently detecting and grouping digits by visual characteristics.

## EDUCATION

### **Independent University Bangladesh(IUB) [2021-2025]**
