PROJECTS

Rent On — A Real Estate Rental Solution

I developed a rental website featuring easy property listings with intuitive property searches, tenant management, secure payments, and streamlined communication for hassle-free renting.

Hexa Shop — Online Shop Management

I developed an online shop management website featuring inventory tracking, order processing, secure payments, analytics, and seamless customer communication tools.

Rafi Sharkar — A portfolio website

I created a portfolio website showcasing my skills, projects, achievements, and experiences, offering an interactive and professional online presence.

K-mean Cluster — Digits Detection Image Processing

I implemented a K-Means clustering approach for number classification in image processing, efficiently detecting and grouping digits by visual characteristics.
